

Sintelsat provides Satellite Based Internet connectivity/ VoIP Solution to U.S. Soldiers at Camp Bucca near Umm Qasr in Southern Iraq

Stony Brook, NY, April 17, 2007-- Sintel Satellite Services, Inc. New York is proud to announce the successful implementation of the satellite based communications solution for U.S. troops located in Camp Bucca. Sintelsat have supplied, installed and commissioned a satellite earth station in Camp Bucca for the growing demand of US troops to connect back home with their families and loved ones. The solution was implemented in record time with our teams located in New York, Germany, Iraq and 24 x7 x 365 NOC support operated around the globe at several locations. Connectivity to the US is being provided using Intelsat satellite system and Tier-1 fiber backbone that provides instant voice and data connectivity to US at the lightning fast speed. The earth station and satellite services were successfully commissioned last week at one of the largest U.S. facilities in southern Iraq.

Camp Bucca is the primary facility for enemy prisoners of war by the Coalition forces located near Umm Qasr in southern Iraq. The camp was named after Ron Bucca, a New York fire marshal and Army Reservist who died in the Sept. 11, 2001 attack on the World Trade Center. Camp Bucca is composed of 10 compounds and became the largest detainee facility in Iraq. Hundreds of American soldiers including Multinational forces made up the Navy Provisional Detainee Battalion.

Sintelsat communication solutions feature satellite and terrestrial based data, voice and video capabilities in secure environment with virtually lightning fast connections, web applications development, VoIP and many other communication capabilities that allow the overseas missions to communicate with their US based organizations, businesses, families and loved ones in any part of the world.
