

## FOR IMMEDIATE RELEASE

### Sintel Satellite Services Celebrates 10<sup>th</sup> Anniversary

**Stony Brook, NY- September 30<sup>th</sup>, 2007-** Sintel Satellite Services' ten year anniversary was marked with grand celebration all over the globe including the company offices in Afghanistan, Iraq, Dubai, Lebanon, Saudi, Kenya, Nigeria, India, and the Philippines. Over the course of ten years the company has established an extensive network of worldwide customer relationships, local partners and teaming arrangements spanning more than 30 countries, successfully establishing its presence in major emerging markets throughout North America, Asia (Central and South East), Europe, the Middle East, and Africa.

Sintelsat serves a wide array of customers including private enterprises, corporations, federal & state governments, embassies, UN agencies, World Bank, International Missions, and many others. Sintelsat has established a network of Field engineers in growing markets such as Afghanistan, Iraq, Dubai, Saudi, Sudan, Nigeria, Lebanon, India, Philippines, and Libya. Founder and CEO, Sanjay Singhal, has envisioned the company as a global leader in reliable and cost effective satellite and terrestrial solutions. Sintelsat is equipped with high levels of expertise in solution provision for the most challenging requirements of the customer in some of the very difficult geographic locations with no or virtually no infrastructure. Our unique business approach allows us to deliver world class innovative solutions into emerging markets for some of the top notch customers.

Throughout the years, the Middle East and Africa have rapidly expanded their markets allowing Sintelsat to strengthen its presence in the MENA and African region. Sintelsat continuously provides hi-tech communication solutions to the Middle East and Africa. Satellite based IP connectivity, iDirect VSAT solutions, SCPC and DVB services are available using the teleports in Hong Kong, Germany, and Washington , DC. Satellite solutions are available for broadcast and uplink services. The U.S. government is one of the company's major customers in these regions. Sintelsat successfully implements large projects for the U.S. government for U.S. Bases, International Missions, and Embassies.

Sintelsat has expanded its solution base from traditional satellite based solutions to hybrid solutions that involve the combination of satellite, fiber, and wireless technologies. Its newly developed capabilities in the RFID, WiMAX, and Remote NOC services are promising areas for future development in upcoming years. Our teaming arrangements with some of the large government contractors and relationships with

industry's best suppliers, technology providers and vendors provide us the capability to put together complex, hard to find and geographic dispersed solutions under one roof. Many of our large customers come to us on repeat basis for our excellence in work, quality, flexibility and expedited response time.

On June 2007, Sintelsat was certified as a Minority-owned Business Enterprise (MBE) by the City of New York Department of Small Business Services. On September 11, 2007, Sintelsat received additional certification from the National Minority Supplier Council (NMDC) categorized as Minority Business Information Systems (MBISYS) company. The company is currently pursuing quality certifications and applying to various programs like the New York State W/MBE, 8(a) Program, SDB and HUBZone.
