

FOR IMMEDIATE RELEASE

SintelSat Started a new Facility at the Center of Excellence at Wireless and Information Technology (CEWIT)

Stony Brook, NY, September 1, 2009— Sintel Satellite Services, Inc. (SintelSat) started a new facility at the Center of Excellence at Wireless and Information Technology (CEWIT).

Stony Brook's Center of Excellence in Wireless & Information Technology is a next generation research and educational facility. The CEWIT facility, housing 40 new research laboratories, was designed to enable an extraordinary scope of activity. It not only fosters specialized research and development in all major areas of wireless & information technology, it also promotes interdisciplinary work among various specialties and with advanced technology providers and customers in leading sectors of the U.S economy.

CEWIT's new building was opened in March, 2009 offers over 100,000 square feet of lab space.

The new facility includes many new research and development laboratories for CEWIT's 65 researchers and 200 graduate students. SintelSat will have an opportunity to work closely with CEWIT researchers to bring technologies to market.

About the Center of Excellence in Wireless & Information Technology (CEWIT)

The Center of Excellence in Wireless & Information Technology is a \$250 million government / industry / academic partnership leading the next wave of the wireless and information technology revolution. Its mission is to conduct world class interdisciplinary research in the emerging critical technologies, foster new enterprise development, address the technology worker shortage and become a world leader in wireless and information technology. CEWIT has over 70 affiliated faculty and staff, 190 Ph.D. students, an industrial advisory board, an international advisory board, a technology council and a project management team with superior experience handling the needs of industry.

About Sintel Satellite Services, Inc. (SintelSat)

SintelSat has evolved from a satellite systems integrator to a cutting edge telecom solutions provider company with global outreach, providing turnkey end to end telecommunication & IT solutions, networks, and services using satellite, fiber, microwave, and wireless technologies.
