

SintelSat Providing Consulting Services to Southern Sudan

Stony Brook, NY, November 19, 2010 — SintelSat providing consulting services to southern Sudan government for a large broadcast opportunity. The referendum scheduled on January 9, 2011 is the result of the 2005 Comprehensive Peace Agreement (CPA) that ended decades-long civil war between North and South Sudan. Under the CPA, the southerners may get a chance to secede from the rest of Sudan. This broadcast opportunity is related to the country's poor infrastructure and massive overhaul required to provide quality broadcasting infrastructure in the country that would be very helpful before, during & after the referendum.

SintelSat has more than 15 years experience working in Africa and started working back in 1996. Our first project in the continent included uplink broadcast for a Portuguese TV channel called RTP, Africa which was broadcasted from Lisbon for the Portuguese African community. Five uplink broadcast stations were set up in Angola, Mozambique, Cape Verde, Guinea Bissau and Sao Tome despite difficult working environment, social unrest, and limited support from the local government. SintelSat thrives in providing cost-effective and innovative solutions for difficult environment with limited or poor infrastructure for social upliftment and help develop the local economies.

About Sintel Satellite Services, Inc. (SintelSat)

SintelSat has evolved from a satellite systems integrator to a cutting edge telecom solutions provider company with global outreach, providing turnkey end to end telecommunication & IT solutions, networks, and services using satellite, fiber, microwave, and wireless technologies.
